

EXCLUSIVE PRODUCTS  
NIRVANA

# NIRVANA<sup>®</sup> RTU

Nirvana RTU is a patented insecticide formulation that is specially designed to mix with liquid fertilizers. Nirvana RTU brings the two molecules (fertilizer and pesticide) and holds them together in a chemical bond.

## UNIFORM

- Uniformly disperses the fertilizer and pesticide in the soil profile resulting in more consistent control.

## POWERFUL

- Reduced genetic trait resistance development by having a second mode of action against feeding pests.
- Controls wireworms, grubs, maggots, and other seedling pests.

## COMPATIBLE

- Most compatible formulation for mixing with starter fertilizers
- Simple, standard use rate when mixing with fertilizer

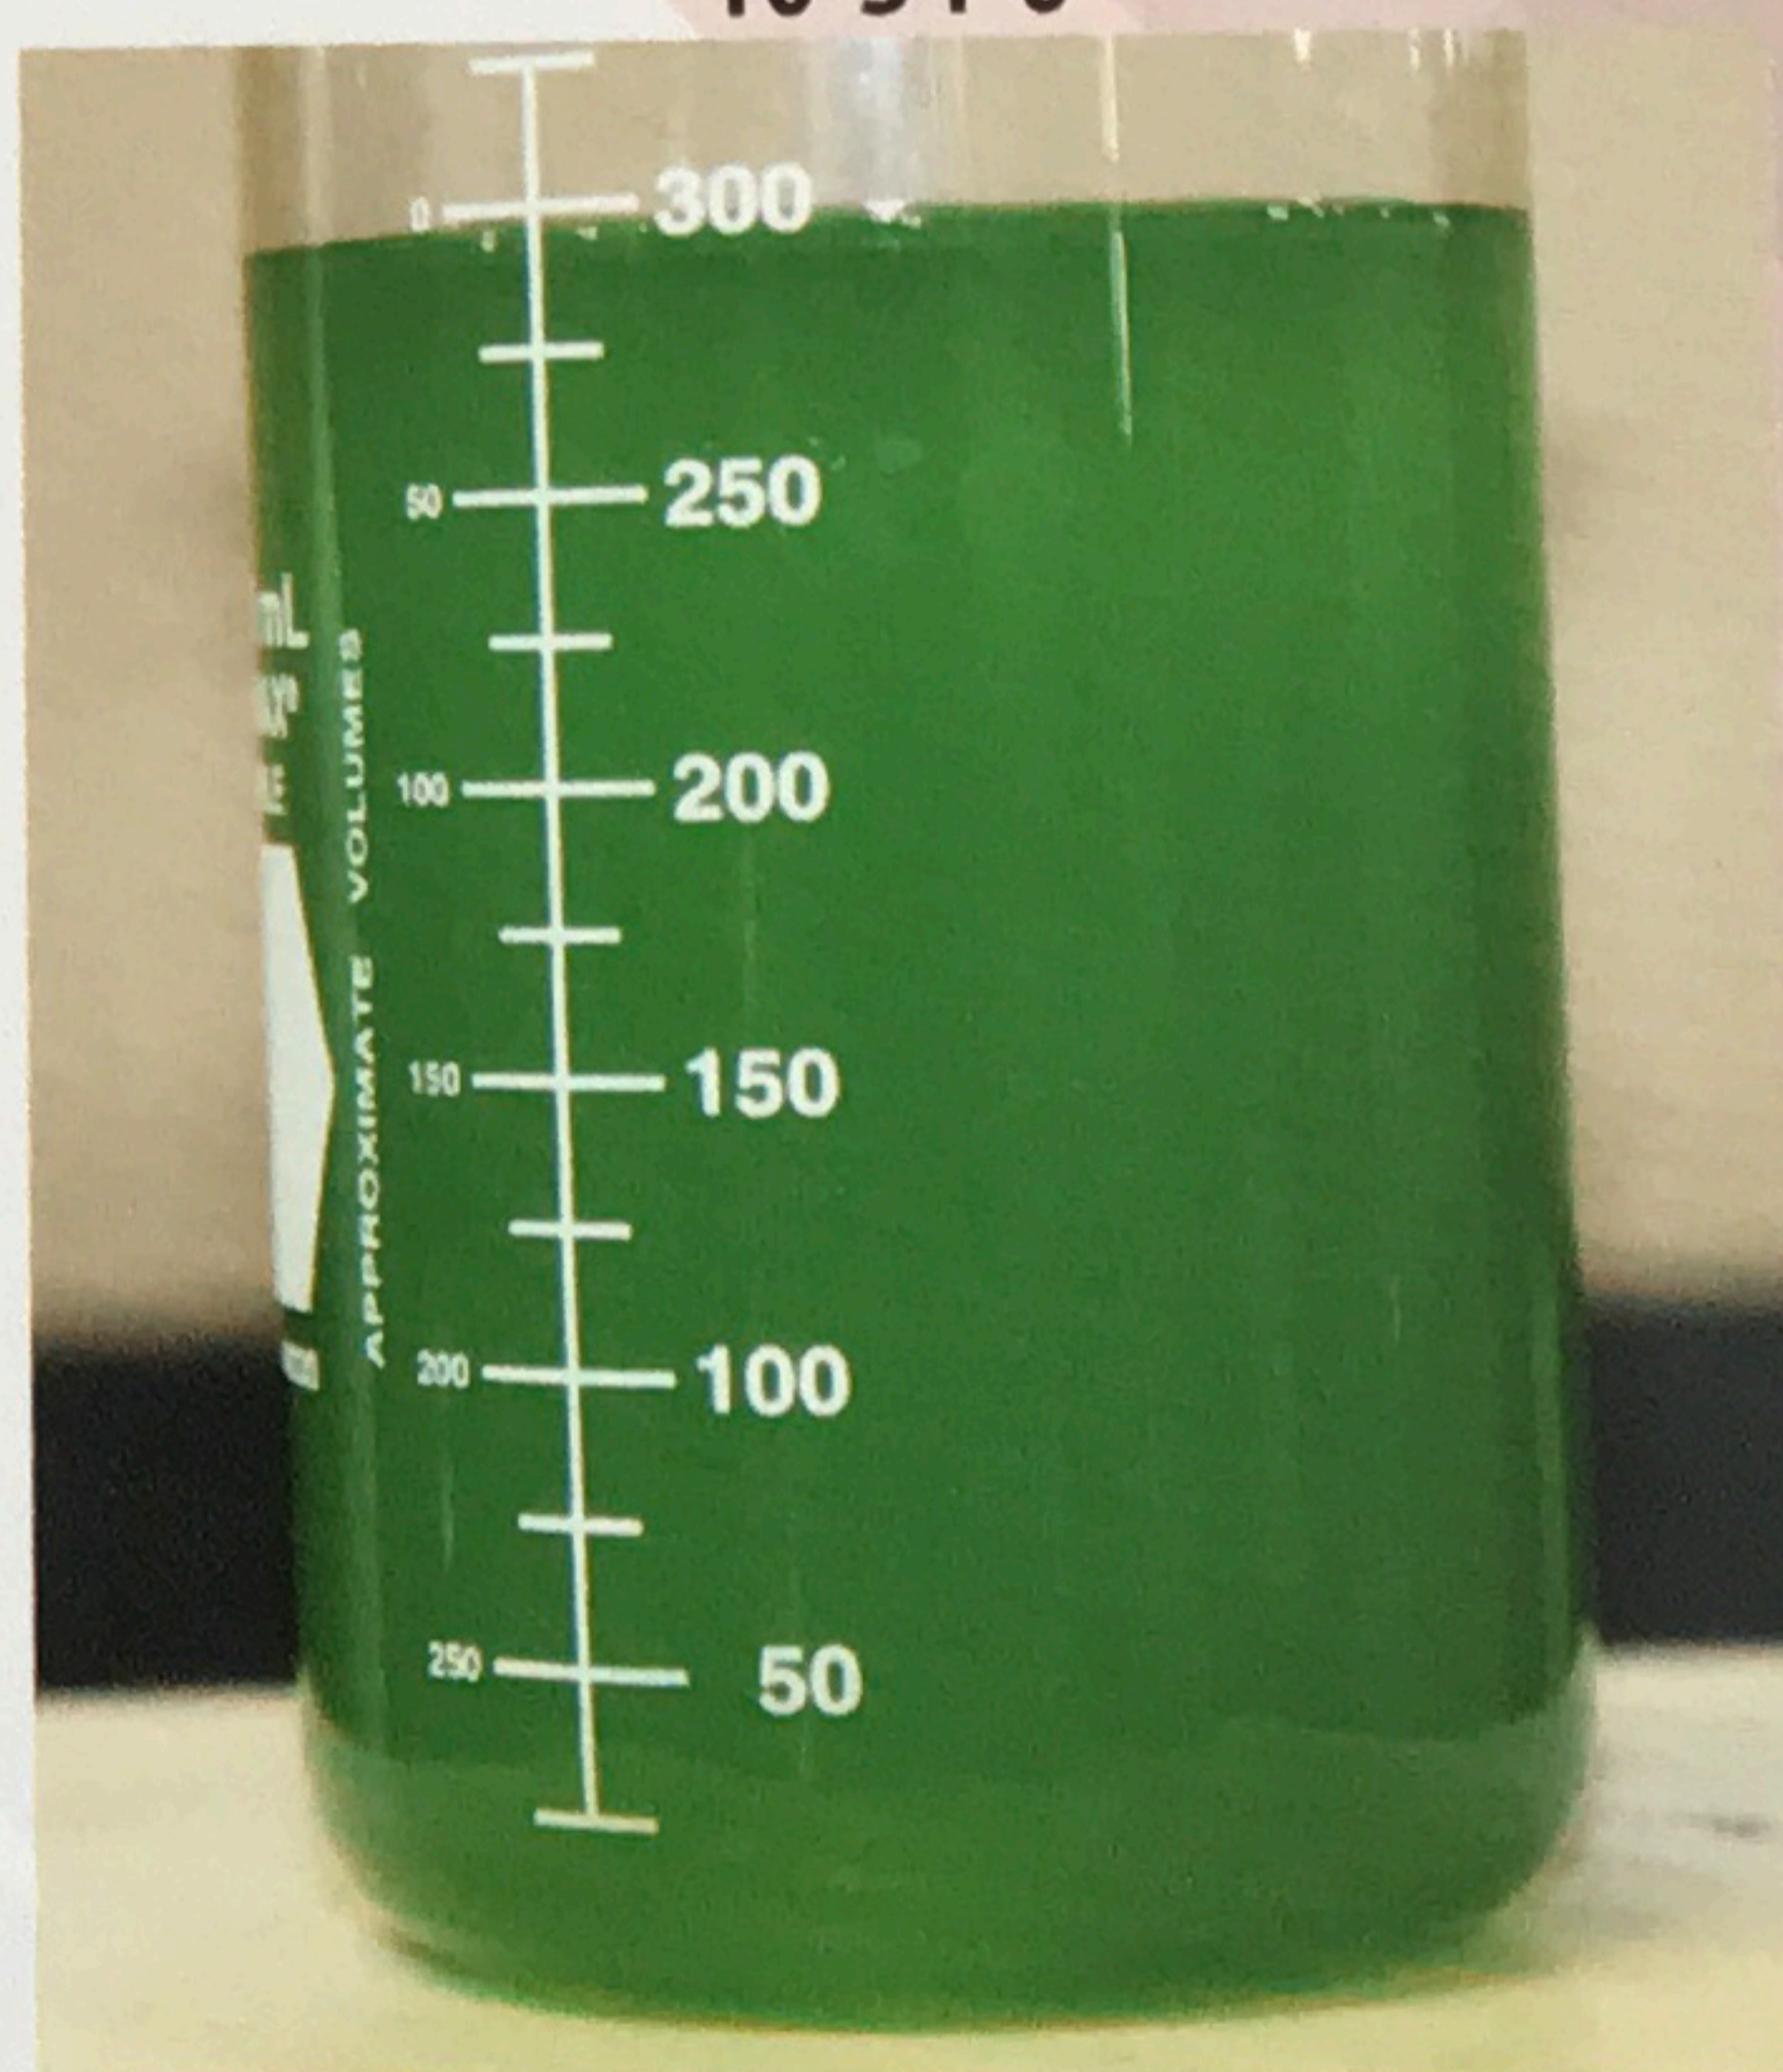

## USE RATES:

3.4-6.8 ounces: Wireworm, Grubs, Seed corn maggot, Stalk borer, Root aphid, Army cutworm, Cutworm species, True armyworm, Armyworm species

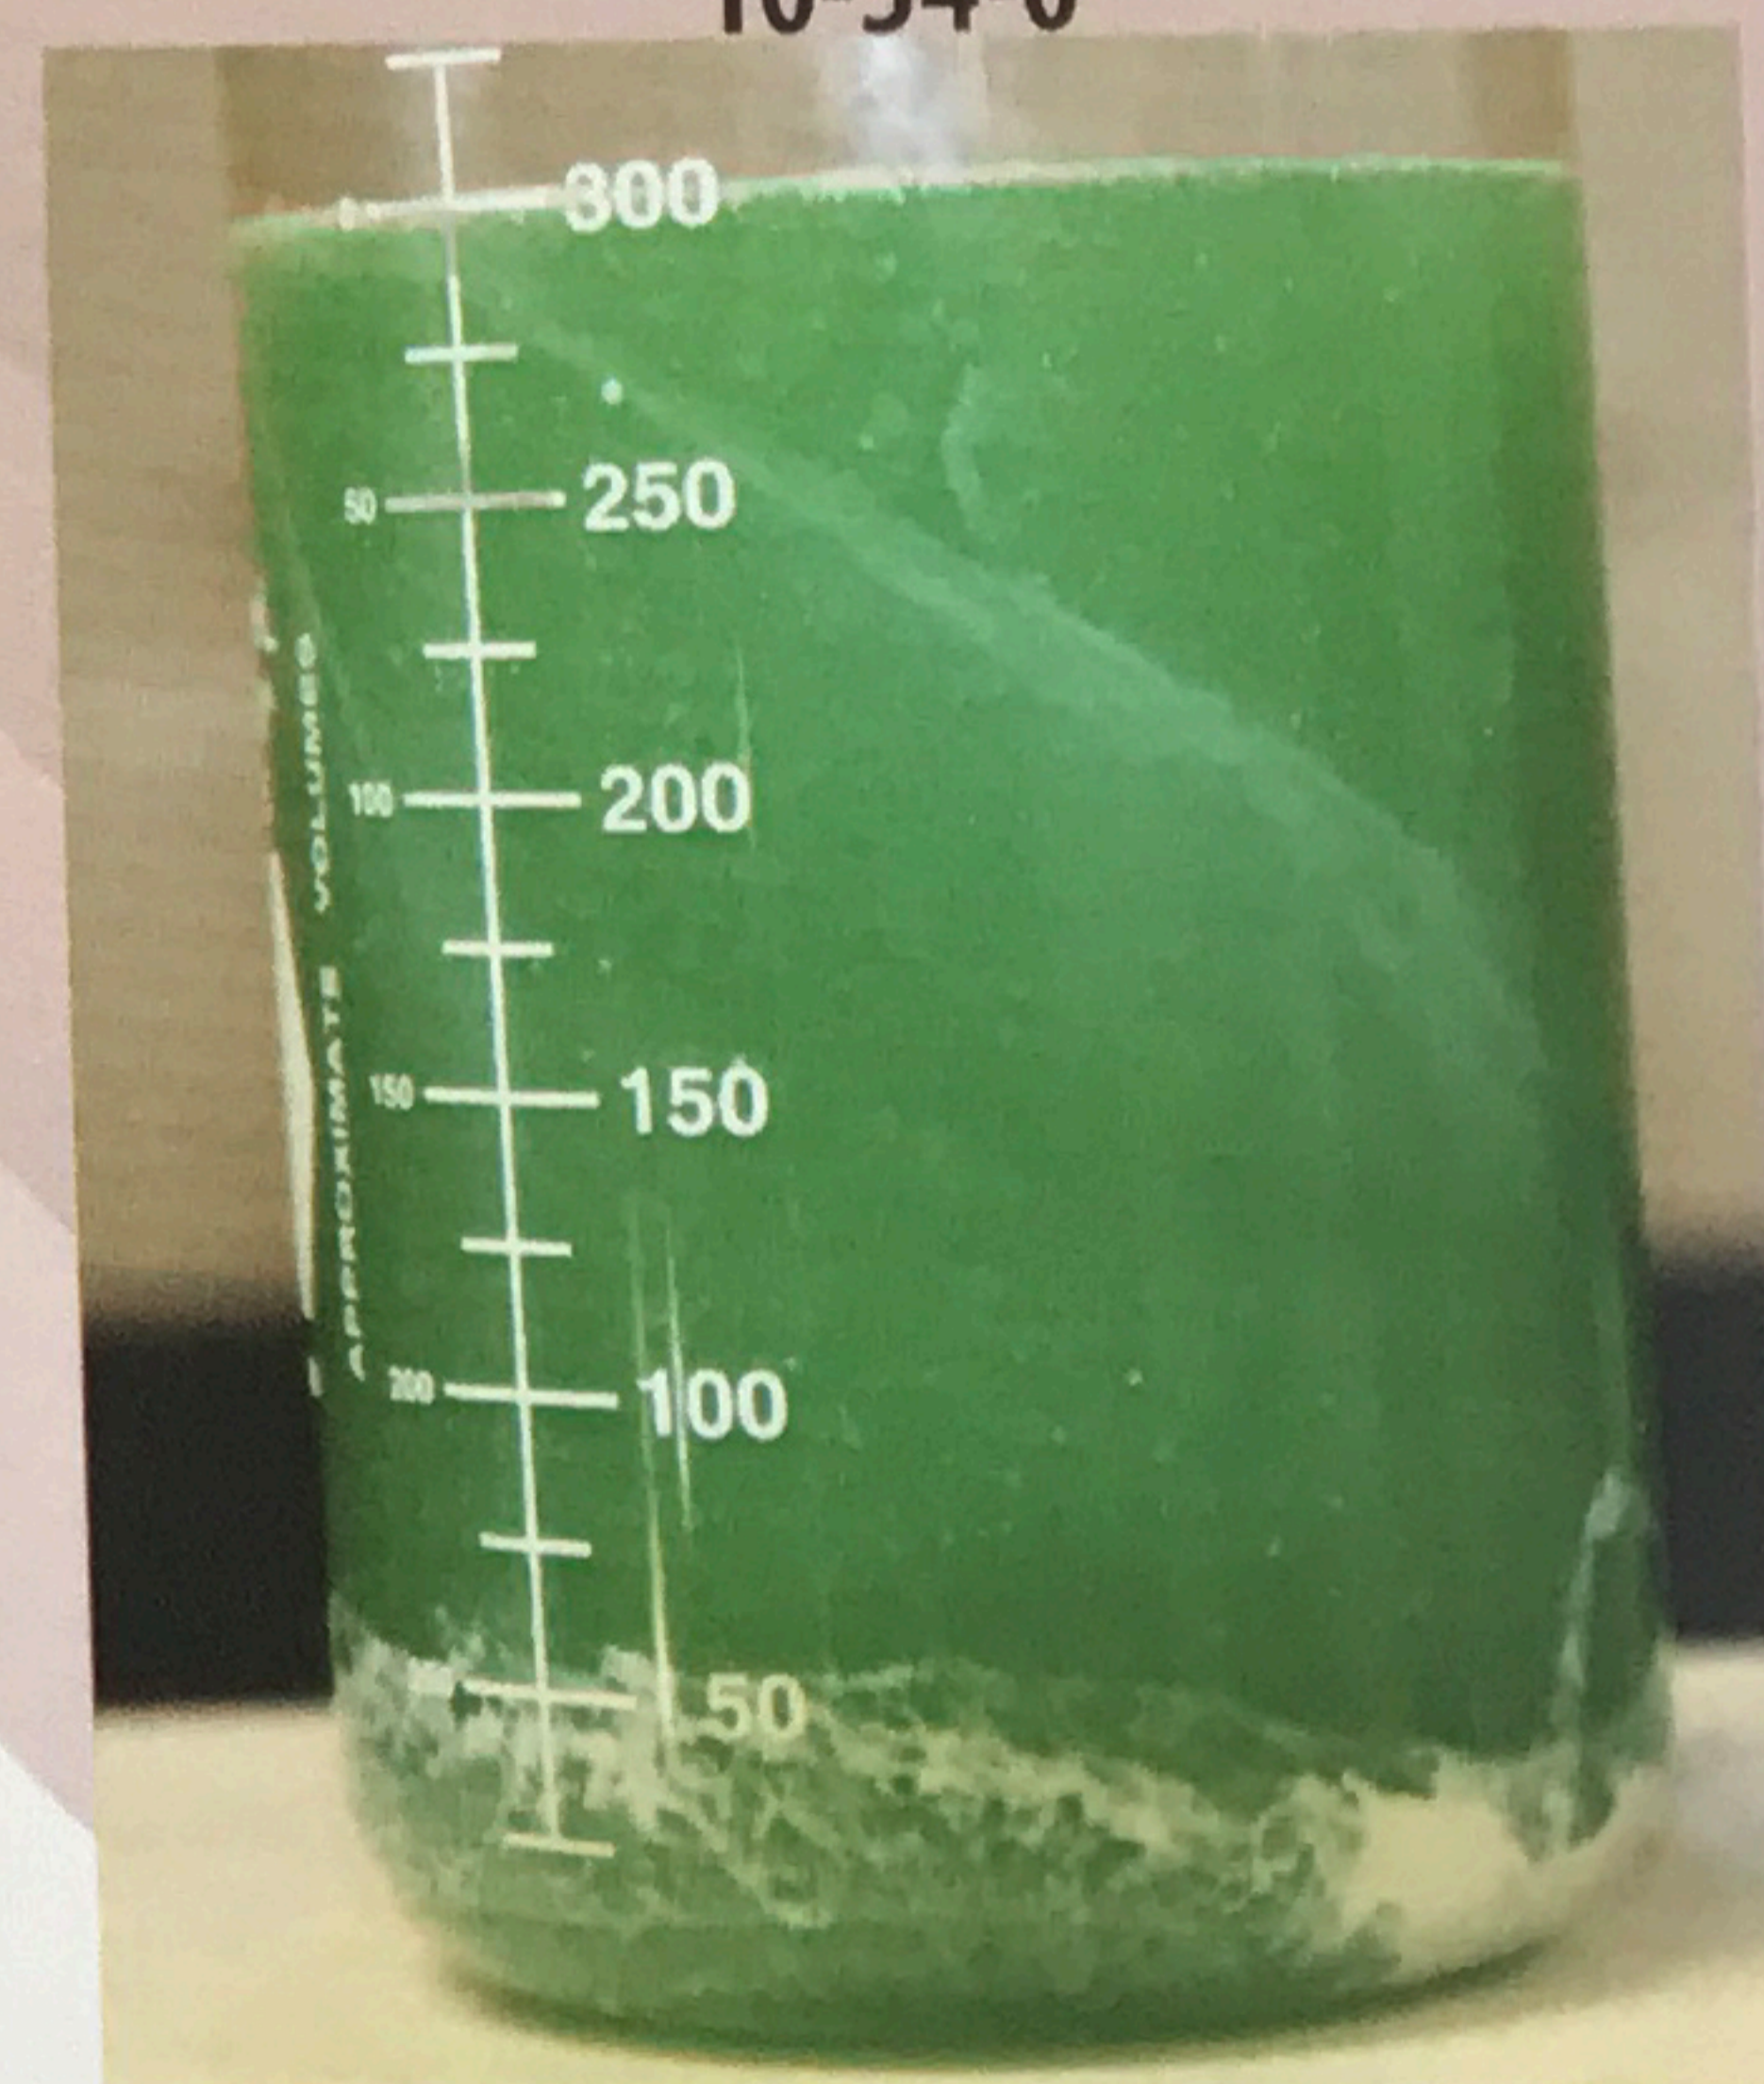

8.5 ounces: Corn rootworm larvae

Broad list of registered crops including corn, soybeans, potatoes, and tobacco-**PLEASE SEE OUR LABEL FOR SPECIFIC USE DIRECTIONS.**
